

TOM ZIMMERMAN Manager of Project Accounting

Tom has practical experience in both business management and accounting. He graduated from the University of Missouri - St. Louis with a Bachelor of Science degree in Business Administration. Prior to joining Walton, Tom served as a business manager for an electric company, taught high school mathematics and also worked as a restaurant manager. He initially brought this wealth of experience to our \$265 Ameristar Hotel and Parking Garage job site and effectively managed all accounting aspects of this large project. Now, as the manager of project accounting he is responsible for all financial aspects of each project. By monitoring and reporting all accounting activity, Tom is able to keep costs at a minimum and potentially aid in savings to the owner.
